DISCLOSURE REGARDING PROGRAM PREPARATION FOR PROFESSIONAL LICENSURE OR CERTIFICATION

COLLEGE	**College of Medicine**
PROGRAM	**Doctor of Medicine**

The University of Central Florida is committed to providing clear and accurate information to current and prospective students to help inform career planning. The UCF program identified above prepares students for state-regulated professional licensure or certification. However, specific licensure and certification requirements may vary by state or territory. Requirements typically include earning a degree or other educational credential from an institution and program that meet certain requirements in that state (e.g., specific coursework, accredited status), passing a state or national exam, and/or working in the field for a period of time or completing a certain number of clinical hours. If your career plans include pursuing professional licensure or certification, it is important to become educated on the credentialing requirements of the state in which you intend to practice.

Effective July 1, 2024, federal regulation requires the university to meet all educational requirements for state-regulated licensure or certification in every U.S. state and territory where its eligible programs are offered. This disclosure is intended to provide you with information regarding the educational preparation you will receive in your chosen program of study.[1]

UCF Program Preparation in the State of Florida

The Doctor of Medicine program is designed for in-person course delivery. Although some limited online options may be available, students must take a preponderance of their coursework in the major in person within the state of Florida.

This program's curriculum meets the educational requirements for graduates to be eligible to apply for licensure as a medical doctor in the state of Florida. For information on all requirements for this credential,[2] please review the Florida Board of Medicine requirements here: https://flboardofmedicine.gov/.

UCF Program Preparation in Other U.S. States and Territories[3]

This program meets the educational requirements for graduates to be eligible to apply for licensure as a medical doctor in all U.S. states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands.

We have not determined whether this program meets the educational requirements for graduates to be eligible to apply for licensure as a medical doctor in American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau.

Additional requirements for licensure in all states include postgraduate training, with the required length varying by state. Depending upon the state, candidates for licensure also have time limits for completion of the USMLS licensing examination sequence. The Federation of State Medical Boards provides information on requirements to practice as a physician in each state and includes direct contact information for each

licensing jurisdiction and their legislative policies: https://www.fsmb.org/contact-a-state-medical-board/. You are also welcome to reach out to the UCF program contact identified below with questions in this regard, and we will do our best to assist you in your career planning.

Additional Information

The U.S. Medical Licensing Examination (USMLE) is a three-step examination for medical licensure in the United States. The initial two national exams (USMLE Step 1 and 2 CK) must be taken and successfully passed while enrolled in the UCF MD program for both graduation and entry to a medical doctor residency program in the United States. The third exam (USMLE Step 3) is normally taken approximately one year after graduation from the MD program while in residency training. This third exam is used for state licensure as a physician and provides the physician with the sanction to practice as a physician in that state.

Enrollment Eligibility Restrictions[4]

To comply with federal enrollment restrictions, UCF may only enroll students physically located in the states and territories where it meets all educational requirements for the credential it prepares students to achieve. Accordingly, we are generally unable to enroll students physically located outside Florida during their first term of enrollment in the program. However, students may be eligible to enroll upon submission of a signed attestation of their intention to pursue licensure in a state or territory where UCF does meet educational eligibility requirements. Please reach out to the program contact listed below for additional guidance in this regard.

Programmatic Accreditation[5]

This program is accredited by the Liaison Committee for Medical Education (LCME) that maintains accreditation standards for all U.S. educational programs that culminate in the MD degree. Recognition by LCME is specific to the program and is distinct from UCF's institutional accreditation that is required for other purposes, including UCF's authorization to award federal financial aid to students.

UCF Program Preparation Outside the United States

This disclosure does not address program eligibility in countries outside the United States. We have not determined whether this program meets the educational requirements for graduates to be eligible to apply for licensure or certification outside the United States. It is important to become educated on the credentialing requirements in the location in which you intend to practice.
