**Installation Guide**

Magento 2
Custom Price

Version 1.0.0

Introduction

Magento 2 Custom Price extension facilitates store owners in getting the custom price of the product from the customer base. It's useful when the store owner can't fix the product price of his store. From the admin end, the store owner can fix the price according to their desire which will be the lowest in the ideal case, which will not be visible to the customer.

Installation Steps

1. ## Upload Extension Folder

    - Get an extension from our extension store or marketplace.
    - Unzip the extension and upload the folder structure to your store root directory like the following image

2. ## Install and Activate the Module

    Login to your SSH server and go to your root directory of Magento2 installation. Enter the following commands via SSH using Putty or others.

    php bin/magento setup:upgrade
