

HT4 SCADA Software Program

State of the Art Human Machine Interface (HMI)

State of the Art

Combines graphics & data with the power of an Internet Browser. Developed specifically for use in water & wastewater industry. Benefits from years of experience in the field. Evolving features & integrated tools driven by the needs of utility customers.

Unlimited Licenses & Free Upgrades

Unlimited licensing, allowing users to have unlimited clients, tags & connections. Licensing model makes for a system that is fully scalable while being practical & affordable. All of our SCADA Software upgrades are provided free of charge.

Self-Contained

Runs on our manufactured Hyper SCADA Server, a wall-mounted appliance with network connectivity to HMI clients & Internet. Self-contained design isolates the critical remote equipment polling, data collection, storage & information serving functions from the operator interface (a true Client-Server Architecture).

Mobile App

Included HT4 mobile app is a streamlined version optimized to run effectively on smartphones (any cell carrier) & Wi-Fi devices. Essential tools needed for working in the plant, field & office. Control in the palm of your hand, ability to view & acknowledge alarms, & run data trends & reports on collected data.

FEATURES

- Unlimited I/O Point-Count (Tags) License
- Unlimited Development & Run Time Licenses
